

Binoculars
Luchs

The Luchs represents the new top line of Bresser binoculars. Elegance, robustness and high optical quality - these characteristics do not necessarily disqualify each other. With its for an 8x42 binocular very compact dimensions, the Luchs is very handy and makes extended observations possible.

with big focus wheel. wide eye relief and (for eyeglass wearers) retractable eyecups give unspoiled observing fun! A very special characteristic is the minimum focus distance of only 1.2 m - this allows the observer to watch e.g. butterflies in full format!

The high-quality and fully multi-coated optical elements with BaK-4 prisms give a sharp and high-contrast picture over the full field of view. Last but not least, the waterproof construction
