

Red Dots Scope and Reflex Sights

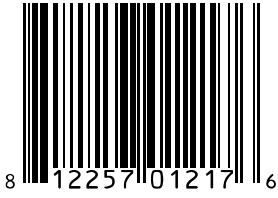

Bresser Red Dots are built for the Hunter and Competitive Shooter. The exterior finish of our Red Dots is anodized. All Red Dots use optical glass, multi coated, and have a rheostat for variable IR dot intensity.

Most Bresser Red Dots are designed with an integrated Weaver Mount. Finally, some selected Red Dot models are designed with a changeable reticle and IR dot color.

Model	Intergrated Mount	Objective Lens Diam	Waterproof	Multi Coated	IR Dot Color	MOA	Selectable Reticle	Click Value	UPC
