

Tactical Lights and Mounts

True View Tactical has been designed with meeting the conditions of a Police or Military Weapon or purpose. The anodized finish, tough water proof conditions, and testing for automatic fire make a long lasting attachment to your weapon with dependability.

All Red Dots are waterproof, shock proof, designed to be attached with a integrated Picatinny mount. The IR dots have adjustable brightness controls and some models have the ability to select between colors.

The True View Tactical Lights use Cree Bulbs and come equipped with a low noise remote switch.
